

# WiZARD 510

Comfort and stability for sleep-disorder breathing therapy  
- Improving sleep quality and long-term therapy compliance

Be well, Live well

**Wellell**

# WiZARD 510

## Sleep Comfortably, Quietly, and Safely

Individuals with sleep-disorder breathing can experience improvements in their sleeping quality as quickly as two weeks of positive airway therapy and significantly reduce daytime sleepiness and its impact on quality of life. Factors such as properly minimizing breathing obstruction incidents, improving mask comfort, and reducing the risk of pressure sores, air leakage around the cushion, claustrophobia, nasal congestion, and additional complications from frequently treatment sessions drastically impacts therapy compliance.<sup>1,2</sup>

WiZARD 510's human-centered design for maximum stability and comfort, unobstructed vision, minimal noise, and easy maintenance simplifies the therapy process, improving user experience and long-term adherence to positive airway pressure therapy.

Continuous comfort on the face allows users to stay asleep all night and wake up without markings on the skin.

Users are free to enjoy nighttime leisure activities while receiving steady air pressure with a fitted mask.

# Increasing freedom during CPAP therapy, improving user comfort, experience, and sleep quality.

**Quick Snap-on**  
Assemble the mask promptly and easily for replacement and cleaning

**Simple Wearing**  
Simple putting on and taking off design makes therapy setting trouble-free

**Breathable Headgear**  
Breathable and durable material gives comfortable experience

**Flexible Connection Tubing**  
Easy to move during sleep

**Easy to Take Off Headgear Clips**  
A buckle-off design is for a quick release of the strap

**Quick-Released Swivel**  
One hand to disconnect the tube by the swivel

Getting a full night's sleep for the user and their partner is much easier without noise and air leaks disruptions.

Simple cleaning and storing steps keep the therapy process hassle-free and quickly help users develop good maintenance habits.
